ECO-BATIC®

THE REVOLUTIONARY LINE
OF CO₂ GAS COOLERS FOR
A CLEANER, HEALTHIER WORLD

ECO-BATIC® is the revolutionary line of adiabatic CO₂ gas coolers with "V" exchangers. It introduces innovative solutions such as the configuration of the adiabatic panels, a booster system for water recovery that minimizes waste and an electronic control of functions managed by proprietary software.

KCE-S CO₂ GAS COOLERS KCE-K AIR COOLED CONDENSERS

The KCE-S and KCE-K have been developed to meet a wide range of applications in the air conditioning and refrigeration sectors. Thanks to the innovative design concept that has led to the definition of new optimized and modular components, are ready to respond to future developments in energy directives.

CDC Ø 800 CO₂ UNIT COOLERS

The range of CDC cubic air coolers for CO₂ systems is expanding today with models equipped with Ø 800 mm fans to better adapt to large industrial plants dedicated to the preservation of fresh and frozen products.
