Launched in 1994, Refra is a well-known manufacturer of refrigeration equipment in Europe today. Distinguished by a highly complex and unique offer of refrigeration products, the company can design and manufacture **non-standard products, fully customized and completed according to customer requirements.**

The company offers a large range of refrigeration products, such as Compressor packs, Condensing units, Chillers and CO2 systems. With long-term experience, the company's employees can offer impeccable dedication to customers, the most efficient solutions and the highest quality equipment.

Refra, like any other progressive business, strives to contribute to the reduction of pollution in the world. **As a result, more attention is being paid to natural refrigerants such as CO2, hydrocarbons, ammonia.**

CO2 SOLUTIONS

Refra has been producing both transcritical and subcritical CO2 refrigeration systems for over 10 years, providing the expertise and experience needed to deliver high-quality products. The versatility of CO2 refrigeration systems allows them to be adapted for various climates. Serving both commercial and industrial sectors, Refra's CO2 systems are designed to meet a wide range of cooling capacities and applications.

R290 CHILLERS

With over 10 years of experience in producing propane refrigeration systems, Refra offers unparalleled expertise in ensuring reliable and safe solutions. R290 chillers deliver superior cooling performance and energy savings, making them an optimal choice for industrial and commercial applications.
